South India Megafauna & Endemics

(12 Nights)

Highlights

South India is among the great wildlife destinations of the world, with excellent protected area networks that hold sustainable and visible populations of **megafauna**. The foothill forests of the **Western Ghats** of south India, an **extremely biodiverse**, mountainous ecoregion, are possibly the best locations to observe and photograph **Asian elephants** in wild. These forests also hold healthy populations of two globally endangered big cats – the **Tiger** and **Leopard** and of the **Indian wild dog**, another significant peninsular predator. **Gaur**, among the largest of bovids, are also found in these forests along with several species of deer and antelope making up an impressive list of large mammals that are found within this ecoregion.

The moist forests of the Western Ghats, globally recognized for their unique assemblages of flora and fauna, are home to their share of mammals that are found nowhere else in the world. Notably, the list includes two primates - the **Nilgiri langur and the Lion-tailed macaque; the Nilgiri tahr, an endemic mountain goat; and rarities like the Brown palm civet, Brown mongoose and Nilgiri marten**, among several species of squirrels, bats and rodents.

We traverse a significant length of the south India's Western Ghats on this guided tour - from the Nilgiris in the north to the Cardamom hills in the south, exploring south India's best wildlife destinations along the way. These locations are also fascinating for their birds, smaller animals, floristic diversity and scenic beauty. In addition, south India's vibrant and historic culture and friendly people will be a charming addition to your overall travel experience. This tour is ideal for those who want to explore a wildlife-rich ecoregion in a **safe, comfortable and friendly environment**.

For Whom

Wildlife and wildlife photography enthusiasts

Costs

INR 80000 (USD 1725)*

* Please see terms and conditions for details

WILDLIFE & NATURAL HISTORY TOURS

Email: contact@ficuswildlife.net

Web: www.ficuswildlife.net

(Please note that we can arrange your transfers to Bangalore and from Chennai for an additional cost as appropriate)

Facilities

Accommodation: 3 star hotels/resorts/comfortable home-stays with modern amenities

Food: Largely local and pan-Indian, with a few international dishes

Transport: Road transfers in A/C vehicles. Train transfers in upper class A/C compartments.

Difficulty level: Easy to moderate, with a little hiking in mountainous terrain involved

Best time to visit

October - May (Excellent); June - September (Good)

Itinerary*

Day 1, 2 & 3 Kabini: We leave Bangalore, Karnataka after breakfast and reach Kabini in the afternoon on Day 1. We spend three days exploring the lowland deciduous forests here primarily for a variety of large mammal specialities of south India.

Named after the Kabini river, the area forms the eastern fringes of the Nagarhole National Park. The Kabini river, which forms a reservoir here, defines the eastern boundary of Nagarhole with Bandipur National Park, two of south India's finest wildlife destinations and contiguous with several other protected areas of the Nilgiri Biosphere Reserve (NBR). Kabini is especially interesting within this large protected area network of the NBR, when hundreds of Asian elephants and much other wildlife, congregates around the reservoir during the dry season. Kabini's flat terrain and the relatively open deciduous forests are very good for wildlife viewing and megafauna, including Asian Elephant, Tiger, Leopard and Gaur are regularly sighted, all year round. Other notable wildlife that are often seen in Kabini include the pack hunting Indian wild dogs, sloth bear and several species of deer, primates and small mammals.

* Please write to us with your interests and duration of visit if you require a custom-made itinerary for south India wildlife

Web: www.ficuswildlife.net

Day 4, Bandipur : We reach Bandipur National Park in the afternoon on Day 4 and spend the a day exploring the deciduous and scrub forests of Bandipur for a variety of large mammal specialities of south India.

The wildlife in Bandipur is largely similar to that found in Kabini. However Bandipur's hillier terrain, and adjacent scrub habitats not only provide a contrasting setting for wildlife, but also enhances chances of sighting species such as the shy four-horned antelope and striped hyena, which are very difficult in Kabini. The panoramic mountainscape of the Nilgiri hills, visible from Bandipur, adds to the charming scenery of the location.

Both Bandipur and Kabini are excellent for birds with over 250 species recorded from deciduous, riverine and scrub forests of these location. Mugger crocodiles are regularly sighted basking on the banks of the Kabini reservoir and otters are occasionally seen in the river.

Day 5, Coimbatore: After the morning wildlife trek/safari and a late breakfast, we drive through a scenic route on our way to Coimbatore. We drive uphill towards Ooty (2200m), through the steep Sigur road, as we leave the wildlife rich Masinagudi plateau behind. Sightings of Elephants, Gaur and deer are not uncommon on the way up and we may even be surprised by a leopard or tiger crossing the road as we drive along. We proceed downhill from Ooty towards Coimbatore, on a scenic road passing through, montane habitats on the upper slopes. Overnight in Coimbatore, among the larger cities in south India.

Day 6 & 7 Top Slip: We reach Top Slip by noon on Day 6. We spend the next two days in and around Top Slip exploring the tropical moist forests for mammalian specialities of the Western Ghats.

Top Slip is a scenically located tourism zone within the Indira Gandhi Tiger Reserve - a major protected area within Anamalai Hills of Tamil Nadu. The Anamalais are among the the most interesting natural history locations in south India for their biodiversity rich, extensive mid-elevation and montane evergreen forests. Here we will make a special effort to look for endemic primates including the Nilgiri langur and Lion-tailed macaque and other typically elusive mammals including the brown palm civet, brown mongoose and Travancore flying squirrel, that are restricted to the moist forests of the Western Ghats. Megafauna such as Elephant and Gaur and several other herbivorous mammals are regularly sighted around Top Slip. Tiger and Leopard are found here, but are difficult to see in the area.

Top slip has fantastic birdlife and a good proportion of south Indian and sub-continental endemics. The moist forests here typically engross naturalists with their fascinating diversity of herpetofauna, invertebrates, flora and forest scape.

Web: www.ficuswildlife.net

Day 8 & 9, Munnar: We depart from Top Slip after a morning wildlife trek and late breakfast and drive through an scenic ghat road to Munnar. En-route, we pass through the deciduous forests of the Chinnar Wildlife Sanctuary. As we drive through Chinnar, we will make a special effort to find the giant grizzled squirrel - an endangered animal with a highly restricted distribution in the Western Ghats. Potential for Elephant, Gaur and other smaller mammals as we pass through the sanctuary. We reach Munnar in the evening on Day 8 and spend the next day exploring the high altitude habitats around Munnar for two noteworthy endemic mammals of the Western Ghats - the Nilgiri Tahr and the rarely seen small carnivore, the Nilgiri marten.

Munnar is a small hill station town (1500m) nestled among tea plantations and wet montane forests (sholas) in of the Western Ghats of Kerala. Significantly, a short drive from Munnar will take us to Rajamalai (2000m), within the scenic, high altitude Eravikulam National Park, where the Nilgiri Tahr, an endemic mountain goat, are regularly sighted. Rajamalai is an excellent place to observe and photograph these normally shy animals. We will also visit a beautiful montane elfin forest within the Pampadam Shola National Park (1900m) on Day 9. Here we will make a special effort to find the extremely rare Nilgiri Marten - an endemic Mustelid, typically restricted to higher moist forests of the Western Ghats. While the sightings of the elusive marten is far from assured, we can expect see Malabar giant squirrel, Gaur and Sambar, in this extremely scenic location.

Munnar and surroundings are also excellent for high altitude bird specialities of south India. The unique montane forests and grasslands in the upper reaches around Munnar are floristically interesting.

Day 10 & 11, Periyar: After a visit to Rajamalai in the morning on Day 10, we drive through scenic cardamom plantations to the famous Periyar Tiger Reserve. We spend the next two days exploring the moist forests of Periyar and surroundings for large mammals and mammalian specialities of the Western Ghats.

Periyar, located in the Cardamom hills in the Western Ghats of Kerala, is regularly rated as among the most scenic wildlife parks in south India. The reserve largely encompasses mid-elevation moist forests - among the most biodiverse forest types of the Western Ghats. Periyar provides excellent opportunities for large mammals, especially Elephant and Gaur, along with a diverse assemblage of herbivores and small carnivores. Tiger and leopard are also occasionally seen within its tourism zone. The moist forests in and around Periyar also holds potential for Nilgiri langur, Lion-tailed macaque, Nilgiri Marten, Brown palm civet and Brown mon-goose - species restricted to the moist forests of the ecoregion. We explore Periyar's tourism zone on foot, both during the day and at night. The night trek can be especially interesting, with potential for sightings of rare brown-palm civet and the shy mouse deer, among a host of

Email: contact@ficuswildlife.net

Web: www.ficuswildlife.net

nocturnal animals. We will also make a day visit to Gavi, a forested area adjacent to Periyar, through grasslands and moist forests, for more treks and jungle safaris. Gavi is an extremely scenic locations, with similar wildlife to Periyar, but the rainforest here holds better potential for Lion-tailed macaque than the tourism zone in Periyar.

Periyar is excellent for birds, with a large proportion of south Indian endemics found here. We will also appreciate the amazing diversity of smaller animals, plants and fungi of the Western Ghats moist forests during our treks here.

Day 12, Chennai: After a morning trek in Periyar and late breakfast, we drive to Madurai to connect to the overnight train to Chennai. We reach Chennai, a major south Indian city with an international airport and well connected on the rail network, on the morning of Day 13.

FYI and Guidelines

1. South India is politically stable and is a very safe and tourist friendly region. While petty crimes occur sporadically, crimes rates, are generally low in the region.
2. Climate in south India is generally tropical and constant. However, due to broad elevational range that we cover during the tour, weather conditions can be quite variable based on where you are and when you travel. We will advice you on weather conditions, clothing etc dependent on when you choose to travel.
3. Please bring your binoculars or spotting scope.
4. Please note that wildlife sightings are often a matter of chance. Please be assured that the destinations and personnel have been chosen to maximise chances of wildlife sightings on this tour.
5. Wildlife viewing will be both from safaris in vehicles as well as on foot. We recommend you wear comfortable walking/trekking for walks in mountainous terrain.
6. A hat and sunblock are highly recommended and sunglasses will be useful.
7. Please bring essential medication with you, since the local outlets will not always carry what you are looking for. Do check with your doctor on medication and medical safety before you travel to the region.

Terms and Conditions

1. Costs are calculated based on minimum 4 persons traveling. We can work out a costing for smaller groups, once we have details from you. Maximum group size for this tour is 10.
2. Tour costs are per person based on twin sharing basis ex-Bangalore and is all inclusive (transport, accommodation, food, personnel and all taxes and fees). Personnel includes an a tour leader/naturalist and local resource persons as appropriate. Alcoholic beverages, porter

Email: contact@ficuswildlife.net

Web: www.ficuswildlife.net

- charges, laundry and ala carte snacks are extra. Please check with us on specific items to make sure if it is included in the published tour costs.
3. If you are paying in foreign currency, we might have apply a currency surcharge if the INR appreciates against the USD by the time you travel.
 4. Bookings are confirmed only upon full payment of the tour cost and at least 1 month in advance from the proposed departure date
 5. We reserve the right to cancel the tour at anytime due to unforeseen circumstances. We will refund the entire booking amount under these circumstances.
 6.
 - a. We accept demand drafts in Indian Rupees and online credit card payments in US Dollars through Paypal.
 - b. We accept personal cheques in Indian Rupees, but your reservations will be confirmed only after your cheque is cleared by the bank.
 - c. Indian customers can also use a credit card to pay online through Paypal, but please be aware that you will be charged an additional currency conversion fee for the same.
 - d. Demand drafts/cheques are payable to "Ficus Wildlife and Natural History Tours" located in Chennai.
 7. In case you want to cancel your booking:
 - a. A 100% refund if cancellation requested more than one month before the proposed date of departure
 - b. A 15% refund if cancellation requested less than one month from the proposed date of departure.

Disclaimer
